

White. 1619.

A new Almanack and Prog-
noscificatio for the yeare of
our Lord God 1619.

Being the third after \S Leap yeare.

Calculated for the Mathematician of
the most Honorable Citie of
London, & will serve gene-
rally for the Monarchy
of great Brittainie.

By Iohn White Welwiller to
the Mathematickes.

Genesis, I. 14.

God said, let there be lights in
the firmament of the Heauen,
to seperate the day frō the night,
and let them be for signes, & for
seasons, and for dayes, & yeares.

LONDON.

Printed for the Company of
Stationers. 1619.

The beginning and ending of the Termes, with
their returnes, this present yeare,
1619.

Hillar Terme beginneth the 23. Ianuary, and endeth
the 12 of February. and hath 4. returnes.

{ Octab. Hillar. }
{ Quind. Hillar. }

{ Craft. Purifi }
{ Octab. Purifi }

Pasche Terme beginneth the 14. of Aprill, and endeth
the 10. of May. and hath 5. returnes.

{ Quind. Pasch. }
{ Tres Pasch. }

Mens. Pasch. { Quinq; Pasch. }
{ Craft. Ascen }

Trinity Terme beginneth the 28. of May, and endeth the
16. of Iune. and hath 4. returnes.

{ Oct. Trin. }
{ Quind. Trin. }

{ Quind. Trin. }
{ Tres Trin. }

Michaelmas Terme beginneth the 9. of October, and
endeth the 29. of Nouember. and hath
8. returnes.

{ Octab. Mich. }
{ Quind. Mich. }
{ Tres Mich. }
{ Mens. Mich. }

{ Craft. anima. }
{ Craft. Martin. }
{ Octa. Mart. }
{ Quind. Mart. }

Note that the Exchequer openeth but 8. dayes before
any Terme beginneth, except Trinity Terme, in which
it openeth but foure dayes before.

The common More and moueable Feastes,
according to the

Wholical Directions

Take	Homits,	the moon or Signe in	8. m. 10.
	Glisters,		7. 2. 20
	Gargarismes		6. 5.
	Preparatiues,		11. 2. 20
	Drop retomes & fluxes		8. m. 10
	Purge by neezing.		15. 9. 10

Examine for Blood-letting.

Let blood the sanguine, frō the new moon to the first quar.
The Cholericke, from the first quarter to the full.
The flegmarick, from the new moone to the last quarter.
The Melancholy, from the last quarter to the new moon.

Dangerous times for Blood-letting.

It is dangerous to let Blood in the heat of Summer,
or cold of Winter, and when the Moone is in that Signe
which governeth that part of the Body you would let
Blood. Likewise, with in two dayes of the Change, or
full of the Moone it is not to be done without bigem
cause, as the Apoplexie, Squinancie, or such violent
Maladies.

To the Curious and friendly
Readers.

Curious Readers, you shall vnderstand: that there is a new and profitable Instrument, in the bignes of a Table booke but lately invented by Mr. William Prat called *Arithmetickall Jewell*, by which may be wrought with great speed, ease and certainty, all manner of questions Arithmetickall, and Astronomickall, with the Rules of Algebra in whole numbers, and in fractions without reduction, both in the first and second part of Arithmetick: without Penne, Inke, or Paper.

ofare gouerned by the twelue
Coelestiall Signes.

at night.

White. 1619.

*A Prognostication, for
this yeere of our Lord
God, 1619.*

Being the third after Leape yeere.

Wherein is conteyned the estate of the whole
Yeere, the disposition of each Quarter, and the
inclination of the weather for every Quar-
ter of the Moneth throughout the
whole yeere.

Together with the rising and setting of the Planets,
and the good and euill dayes for each Moneth of
the yeere: with their bandes and accidents,
and other things fit to be knowne, both
pleasant and profitable.

By Iohn White, well-willer to
the Mathematickes.

Imprinted at London for the
Company of Stationers.

1619.

A briefe Computation of time compleat within this present yeare 1619.

yeares, but current 16. yeares.	17.

A Declaration of the

Disposition of the foure Quar-

ters of this Yeare 1619.

And first of Winter.

*The Winter Quarter best doth prophesiate
To all Degrees, and Sexes, their estate.*

Sol in Capricorne, Aquarius, Pisces.

Winter doth ever take his beginning when the
Prince of Lights (the Sunne) doth make his
entrance into the first degree of the earthly
Signe Capricorne, (whose beginning did hap=
pen upon the twelfth day of December the last
Yeare 1618.) and doth continue to the tenth day of March
this Yeare 1619. untill he hath trauesed through these itt.
Hymnall of winterlike Signes, Capricorne, Aquarius, Pisces.

The naturall disposition of this Quarter is cold and
moisture, & participateth of the Phlegm. tick complexion,
which Element hath cheifest predominacion euery day in
the yeare. from itt. of the clock after noone, untill itt. of the
clock at night. Now do the searott Partners endure many
a bitter storme on the raging Ocean: the Willowes swell,
and the winds do roare: Inundations abound: the Ayre
is extreame cold: Daies do shorten, and Nights lengthen,
and the bigelancy of euery living creature decayeth: Now
are the Earthly poores inclosed and shutte by reason of the
extreame coldnes of the ayre. fowles conet to the warmest
Regions: Beasts seeke them a shelter: and fishes betake
themselves to the deepe st of the waters: and what the sum=
mer soztable Spring and cheerefull Sommer doth nourish, this
Quarter doth destroy and vanish. Necessary it is that we
now be such Meates whose operation are hotte and dry,

A Prognostication.

(being opposites to the season and temper of the ayre.) The outward parts of the body are now very much weakened by the coldnes of the ayre, and naturall heate is shynen into the inward parts of the body, to comfort the vitall spirits, and to helpe digestion. It is convenient to expell the coldnes of the ayre by warme drinckes, strong wines, and comfortable Brothes: We carefull to keepe thy Head and Feet from cold and wet: And yet will the body digest more grosse and strong meates then in Sommer, by reason of the inward heate.

Such Sickneses as are most commonly attending on this Quarter are these, or such like, as Leprosies, Salles, sore Eyes, Tooth-ach, Rheumes, Catarrhs, Coughes, Sores, Goutes, Cramps, Agues, Fluxes of Blood, &c.

Of the second part of the Yeare, called the Spring.

*The Spring compared is to Infancy,
To spring and grow in virtue till we dye.*

Sol in Aries, Taurus, Gemini.

THE cheerefull Spring doth take his beginning when the Sun doth enter into the first degree of the first Equinoctial signe Aries, (which doth happen vpon the 21. day of March) and this Quarter doth continue till hee hath passed it through these three vernall Signes, Aries, Taurus, and Gemini, and doth end vpon the thirtiethe day of June.

This Quarter of his naturall disposition is hot and moist, participating of the Sanguine complexion; which Element hath government from nine of the clocke at night, till three of the clocke in the morning. Now are the dayes equally deuised in length to the nights, and the golden Sunne casteth his splendent rays (smiling as it were) vpon the face of the Earth, and giueth somjoy to all sensible and insensible creatures. This is the most wholesome and pleasant Quarter in the yeere, a convenient time to expell Diseases of a long continuance; and to preserve and keepe

the body in health. Birds of the ayre doe couple, the Beasts of the earth doe increase, and the Fishes of the waters doe multiply in abundance, leaving the deepe to line in shallower places, the fruitfull earth both now produce and bring forth all manner of Plants and Herbs for the necessary use of man and beast. Men may now inure our bodies to somewhat smaller and cooler drinks then in Winter, and likewise abate somewhat in eating: but take such things which is of nature hot and dry. This Quarter is most convenient for Purging, Sweating, Bathing, and Bleeding.

The Diseases incident to this Quarter are pushes in the face, Scabbes, Measles, Small-pocks, Kings-euill, Phyesies, and the like.

Of the third part of the Yeere called Summer.

*Like Man in his chiefe state and lusty yeares.
The ripening Summer Quarter best appeares.*

Sol in Cancer, Leo, Virgo.

Summer doth euer begine when the Sunne doth take his entrance into the first degree of Cancer, which is vpon the thirtieth day of Iune, and doth continue while he maketh his progresse through these three Solitull Signs, Cancer, Leo, and Virgo, and doth end vpon the thirtieth day of September.

The naturall condition of this Quarter is hot and dry, and of the Collicke complexion, which Element hath government from thre of the clocke in the morning, till nine of the clocke in the forenoone, Now is heate at the highest, and floods at the lowest, the dayes are longest, and the nights shortest; the winds and Seas (for the most part) quiet; fruit most delicate, and flowers most pleasant. The busie and painefull Bees gathereth their honey, and the labouring Husbandman gathereth his fruites for the sustenance of man.

A Prognostication.

Serpents come creeping from their holes and Denes. Now naturall heat is dispersed into all the outward parts of the bodie, and man is not so hot now within as in the Winter, and our digestion is more feeble and weak: we may drinke more freely now then in Winter, so it be small and cole: And the lesser sorte of meate doth best suffice nature, and such as is boyled is the most wholsome. And vnto such things whose operation is cold and moist. The Diseases are Pestilence, Fluxes, burning Agues, payne in the Belly and Head.

Of the fourth part of the Yeere, called Autumne or Haruest.

*As Autumne steales the sappe from Tree and Flower,
So Death comes creeping neerer euery houre.*

Sol in Libra, Scorpio, Sagitari.

Autumne, or Haruest, (commonly called the fall of the Leafe) vsuall taketh his beginning when the Sunne doth enter into the first degree of Libra, (which is on the thirteenth day of September, (he being now lea. en in the second Equinoctiall) and doth continue vntill hee passeth through these thre Autum-nall Signes, Libra, Scorpio, and Sagitari; which Quarter doth end vpon the twelfth day of December.

This Quarter by his naturall disposition is cold and dry, and taketh part of the Melancholick complexion; which Element doth rule from nine of the clock in the morning, till thre in the afternoons. The dayes and nights are now againe equally ballanced: Come is reaped, Grasse mowed, fruits are gathered, and the leaues do fall from the Trees and branches, and the face of the Earth now loseth her beautie: Springs and Fountaines are at the lowest, and floods at the highest. Beasts doe seek themselves a shel-
ter

ter against the storms ensuing Winter: And the Serpents
betaketh them to their holes and caves. This Quarter
of all the rest is the most dangerous and unhollous, being
more subject to Diseases then the other: Therefore be-
ware of the morning and evening cold.

The Diseases of this Quarter are divers, as, the
Spleene, Melancholy, Blindnesse, Emrods, Fluxes of
Bloud, Agues, Falling-sicknesse, paine of the Backe,
Bladder and Kidnies. Melancholy passions, Fistulas,
and the like; From which let vs pray unto the Almighty
that hee will deliuer vs, Amen.

The rising and setting of the Planets, with the
disposition of the Weather for every Quar-
ter of the Moone; together with the good
and euill dayes, throughout the whole
Yeere.

Of January.

♄ Saturne is South-west at Sunne rising.

♃ Jupiter and ♀ Venus are neere together shining very glo-
riously in the East before Sunne.

♂ Mars is neere the South at Sunset.

☿ Mercuri riseth a little before the Sunne.

New Moone on Tuesday, the first day, 27. minutes after six
of the clocke at night: some frosts.

First Quarter on Wednesday, the xiiij. day, 7. minutes after 4.
of the clocke in the morning: faire weather.

Full Moone on Tuesday, the xix. day, at 7. of the clocke at
night: some overcasts.

Last Quarter on Wednesday, the xxv. day, 44. minutes after
xi. of the clocke at noone: wet weather.

The } Good dayes, 3. 8. 13. 17. 26. 31. } The rest
} Euill dayes 11. 21. 18. } indifferent.

A Prognostication.

Of February.

The Explanation of this Table

for this Yeere 1619.

S. It is to be noted, that all this yeer Saturne is in Gemini, which both threaten much paine and Disaice of the belly and heart.

I. Iupiter is from the first of January to the twelfth day of April in Pisces; shewing grieft in the Head, Breast, and Heart: Then from the twelfth of April to the end of the yeare, hee is in Aries, &c.

M. Mars, from the first of January to the last of March, is in Libra, shewing Disaices of the Feete, Reynes, and secret Parts. Then from the last day of March, to the xvi. of May, hee is in Virgo. Then from the xxvi. of May, to the xxviii. of July, hee is againe in Libra. From the xxviii. of July, to the xi. of September,

her, he is in Scorpio. From the xii. of September, to the xxii. of October, he is in Sagitari. From the xxiii. of October, to the iii. of December, he is in Capricorne. Then all the rest of the Moneth he is in Aquarius.

☉ And as for the place of the Sunne, you shall finde it in the Kalendar, set downe in red Letters, amongst the Saints Dayes, neere the middle of every Moneth.

♀ Venus, from the first of January, to the xxvii. of Aprill, is in Pisces. From the xxviii. of Aprill, to the xxvi. of May, he is in Aries. From thence to the xxi. of June he is in Taurus. From thence to the xviii. of Iul, in Gemini. From thence to the xii. of August, in Canccr. From thence to the vii. of September, in Leo. From thence to the first of October, in Virgo. From thence to the xxiii. of the same Moneth, in Libra. From thence to the xvi. of November, in Scorpio. From thence to the x. of December, he is in Sagitari. From thence to the end of the Moneth, in Capricorne.

☿ Mercurie, from the first of January to the x. of February he is in Pisces. From the x. of February, to the x. of March he is in Aquarius. From thence to the xxviii. of March he is againe in Pisces. From thence to the xii. of Aprill, in Aries. From thence to the xxix. of the same Moneth, in Taurus. From thence to the xx. of May, in Gemini. From thence to the vii. of June, in Canccr. From thence to the xxi. of July againe in Gemini. From thence to the xxviii. of the same Moneth in Canccr againe. From thence to the xvi. of August, in Leo. From thence to the xxi. of the same Moneth in Virgo. From thence to the last day of October in Libra. From thence to the xx. of November in Scorpio. From thence to the vii. of December in Sagitari. From thence to the xxvi. of the same Moneth in Capricorne. The rest of the same Moneth in Aquarius.

☽ And as for the Moones entrance into the Signes, you have them likewise in the Kalendar, ordinarily placed against every day of the Moneth, &c.

Note also, that the chiefe Significators of Sickneses and Diseases, are Saturne and Mars,

How

A Prognostication.

How to iudge what Weather will follow,
by the ryling and setting of the Sunne.

The Sunne ryling bright and cleare, signifieth a pleasant day: If he rille fiery red, it promisseth raine: If in his rising he be thinly overcast with a cloude, it betokeneth foule weather: If the Sunne disperse the cloude before him into the West, it signifieth faire weather: If at his rising there appeare a circle about him, & vanisheth away equally, it betokeneth faire weather. Also, if he setteth red, it signifieth faire weather: If at his setting he be of divers colours, or cloude like water, it threatneth raine. If at the rising of the Sunne, his beames seeme red, or long, or encompassed with red cloude, it signifieth great winds: If at his setting there appeare a thicke miste, or if it raineth in the evening, it threatneth very foule weather to follow. Also, if the Sunne beames be spotted either greene, pale, or blacke, gathered to a cloude, it signifieth raine. The Sunne setting cleare without any cloude, signifieth a fayre night to ensue. If the circle, or circles about the Sunne be cleare, & of no continuance, looke for fayre weather: If there be many circles, it signifieth winds: the redder they are, the more vehement winds. If the circles are here and there broken, and are thicke and blacke, looke for cold wind, or snow: Or, if he settle behind a great blacke cloude, raine followeth.

How weather is foreknowne by the Moone.

If the Moone in the third day of her change, or three daies before she full, or in the midst of the quarter, be found of pure light, nothing encompassing her, the ends direct vp, shee promisseth fayre weather: but bent to red colour, promisseth winds. The Moone pale, or somewhat black or thicke, threatneth raine. When the Moone is five dayes old, marke the tips of her hoynes, if they be blunt, it signifieth raine; if sharpe pointed and picking upwards, great winds. If in the fourth day after her change, shee haue a red circle about her, it signifieth winds and raine.

Of the iudgement of the weather by the Starres.

If the Starres appeare of much light, and seeme to be of more brightnesse & blazing then ordinary, it betokeneth great winds and

moisture in that part where they seeme so : and in Winter, great frostes. When diuine Staires appeare with long silery tayles, it threatneth winds, and great vought : the more in number, the greater will be the effect. Also, when Staires seeme to shooe or fall, it signifieth great winds in that place: If they seeme to shooe in other places, it signifieth diuers winds : If in all places, winds, thunder, lightning, and most tempestuous weather.

**A short Instruction, and very necessarie to know
the times and seasons when to Sow, and replant
all manner of Seedes for the Garden.**

Sow Cabbages in Februarie, March, or Aprill, in the decline of the Moone : and replant them in the Decrease.

Sow Cabbage-Lettuce in Februarie, March, or Iuly, in the old of the Moone.

Sow Onions and Leekes, in February or March, at the decline of the Moone.

Sow Beetes in Februarie or March, at a full Moone.

Sow Coleworts white & greene, in the middle of August or September : Plant the young ones in October, and sett them againe in November.

Sow Parsneps in Februarie, Aprill, or Iune, in a fayre day.

Sow Radish in Februarie, Aprill, or Iune, in the increase of the Moone.

Sow Pumpions, Cucumberes, Pillons, and Gourdes, in February, March, or Iune, in a hottre and fayre day.

Sow Spinage in Februarie or March, in the old of the Moone.

Sow Parsely, Fennell, and Annis seeds, in February or March at the fall of the Moone.

Sow white Cicory in February, March, Iuly, or August, in a full Moone.

Sow Cardus-benedictus in February, March, or May, when the Moone is old.

Sow Basil in March, in an old Moone.

Sow Purselaine in February, or March, in the increase of the Moone.

Sow Marjoram, Closets, Tyme, flower-gemle, Rosemary, & Lavender,

A Prognostication.

- Sow** Lacender, in February, March, or April, in the increase of the Moone.
- Sow** Garden-cresses, and Rocket, in February, at the increase of the Moone.
- Sow** Saffron in February or March, at a new Moone.
- Sow** Saffron in March, when the Moone is old.
- Sow** Coriander, and Borage, in February or March, in the increase of the Moone.
- Sow** Hartes-horne, & Samphire, in February, March or April, in the old of the Moone.
- Sow** Gilliflowers, Harts-cuse, and Wall-flowers, in March or April, in an old Moone.
- Sow** Cardons, and Artichokes, in April or March, when the Moone is old.
- Sow** Chickweed, in February or March, at $\frac{1}{2}$ full of the Moone.
- Sow** Bueret in February or March, when the Moone is old.
- Sow** Hysope and Sauery in March, when the Moone is old.
- Sow** double Marygolds in February or March, in the increase of the Moone.
- Sow** Larks-foote, Sperges, and Sperage, in February, in an old Moone.
- Sow** white Poppy, and Palma-christi, in February or March, in the increase of the Moone.
- Sow** all maner of Cope the Moone increasing, the being in Cancer, Libra, or Aquarius.
- Set** or sow all kind of Seedes the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricornus, Aquarius, or Pisces: But those Seedes whose Rootes are round, should be sown three or foure dayes before, or after the full Moone.

Certaine

*Certaine, and short Rules, for the comforting of the
chiefe officiall members of the body of man.*

Things vvhich are good to comfort the head.

Lignum Aloes, Marioran, Calingale, Musk, Rosemarie,
Roses, Camomell, Rew, Frankensence, Nutmegges, Hyssope,
Balme, Whins, Spike, and Gladen.

Things good for the Eyes.

Fennell, Celendine, Agrimonte, Eyebright, Uerulne, Roses, Cloues,
and cold Water.

Things good for the Stomacke.

Nutmegs, Dyanum, Copall, Cloymewood, Dainces, Saffron,
Dilbanum, Agrimony, Functore, Cloues, Lignum aloes, Co-
rander, Halkicke, and Spodium.

Things good for the Heart.

Saffron, Cloues, Cinamon, Copall, Lignum aloes, Mace, Ma-
rabolans, Pearles, Marioran, Musk, Buglasse, Nutmegs,
Boysage, Rosemarie, and Setwall.

Things good for the Liver.

Liverwort, great Raisons, Cloymewood, Agrimonte, Saffron,
Cloves, Cardine, Sanders, Fennell, Roldwater, Clolets, Plan-
taine, Dragons, and Lettice.

Things good for the Lungen.

Almonds, Dates, Raisons, Maydenhaire, Licopice, Ciccompane,
Lungwort, Distaces, and Penidies.

Meates hurtfull for the Teeth.

Nettes, Meates very hot, Marine drinke, Sweete meates and
drukes, Radish rootes, Hard meates, Bitter meates, Halks,
much Cloyming, Leekes, Fatte of Filly, Collyports, & Lemmons.

Things hurtfull to the Eyes.

Garlick, Dillons, Radish, Drunkenesse, Letcherie, Sweete and
thicke Wines, Salt meates, Coleworts, all Pulle, Mast, Ollins,
Dye, Smoake, Fire, and reading presently after supper.

A Prognostication.

Rules of Mensuration.

A Fingers bredth is foure Barly comes in thicknes; and an Inch
three Barly comes in length: A handes bredth foure fingers:

A span is three handes bredth: A foot is foure handes bredth:
A Geometrical Pace is five foot: an English Pace is xvi. foot $\frac{1}{2}$.
A Fm long is a hundred. & twenty five paces, or six hundred, twenty
and five foot: An English Furlong is six hundred and threescore

A Prognostication.

foot, or a hundred thirtie two paces : A League is a thousand and five hundred paces : An Italian Mile is a thousand paces, or eight Furlongs : A common German Mile is thirty two Furlongs. An English Mile is eight Furlongs : An Acre is forty Beatches in length, and foure in bredth.

An Explanation of a new and easie Kalendar der heere following.

NOte that every Moneth conteineth three Collumnes, (the figures for the number of dayes excepted) the first Collumne toward the right hand conteineth the Weeke dayes & Sunday letter. The second, the Signe wherein the Moone is every day. And the third, the Changes and Quarters of the Moone. Note that the being placed this way  doth signifie the first Quarter; and this way  the last Quarter. This the Full Moone . And this the new Moone . Note also, that the figures ouer the head of the Moones, signifies the houre of her Change; and the Letters vnderneath, the time after noone, or after midnight, N. standing for after noone till Midnight, and M. after Midnight till Noone : As for example, Against the xiiij. day of Iannary, being Wednesday, I finde the Moone in δ Taurus, and placed thus , which is the first Quarter, at 5. of the clocke after midnight, which is 5. of the clocke in the morning. Again, on the 18. day of Aprill, being Sunday, the Moone is in m Scorpio, and figured thus , which is the Full Moone, at five of the clocke in the after noone, which is five at night, &c.

Note also, that at the head of every Moneth is placed the Rising and Setting of the Sunn for the middle of every Moneth : as for example, For the midst of Iannary, the Sunne riseth at 7. of the clocke, and 40. minutes; and setteth at 4. and 20. minutes. It also conteineth the Holy-dayes, and Feasts, both moonable and immoonable; with the beginning & ending of the Termes : As for example: New-yeeres-day is the first day of Iannary, Twelke-day the 6. of Iannary : Terme begins the 23. of Iannary, and endeth the 12. of February, &c.

A briefe and easie Kalender for this Yeere
 1619. being fit to be placed (being cut out)
